

Professional Grade Gaskets & Sealants

Introducing
GorillaPro®

APPLIED is proud to distribute GorillaPro® products.

Performance Under Pressure

Leaking liquids and gases can be a profit drain on a facility, and pose a hazard to your workforce. That's why professionals use GorillaPro sealants to lock threaded assemblies and flanged fittings, providing a tight seal over a long period of time. Thread sealants create a low-pressure seal and are used in applications such as pipes and hydraulic hoses to seal liquids and gases from escaping through the threads. Our gasket maker is a flexible gasketing solution for rigid machined flanges, designed to replace and outperform preformed, paper, rubber, and cork gaskets.

Protect critical components. Prevent liquid and gas leaks from escaping threaded or flanged fittings. GorillaPro thread sealant and gasket maker prevents leaks and downtime. It's proven anaerobic sealant technology that works reliably every time.

BENEFITS

- **NEW 35ml gel pump dispenser**
- **No drip - no mess - no waste**
- **No priming - easy to use**

Brute Strength. Professional Grade.™

Professional Grade Gaskets & Sealants

GorillaPro® gaskets and sealants were developed to maximize efficiency and minimize the need for machinery maintenance in your facility. The GorillaPro line of adhesives are designed to deliver metal-to-metal bonds that are resistant to shock and vibration.

GASKETS

AG101

Gasket Maker Purple Gel

TIGHT TOLERANCE: Seals close-fitting joints between rigid metal assemblies
SECURE: Best for differential cases, transmissions, and oil pans
DURABLE: Superior chemical and heat resistance while maintaining flexibility for proper gasketing

SEALANTS

AS10

Pipe and Thread Sealant White

FAST: Provides immediate low pressure sealing performance on tapered pipe threads
STABLE: Designed for the locking and sealing of metal pipes and fittings

High-Performance MRO Solutions

Gasket Maker

GorillaPro gasket maker eliminates the need for pre-cut or compression gaskets. Used to fill the voids between metal flanges, it creates a seal that protects the joint against corrosion. GorillaPro gasket maker is resistant to common oils and gases.

- Fills all surface imperfections
- Withstands high temperatures and pressures
- Eliminates micromovement and slipping
- Won't shrink, crack, or relax
- For use on rigid iron, aluminum, and steel flanged surfaces

Pipe Sealant*

In addition to sealing fine threads, GorillaPro pipe sealants can also seal pipe fittings thanks to their ability to withstand most chemicals. These sealants provide a complete seal between threads, offering many advantages over traditional sealing methods like PTFE tape or hemp.

- Fills space between threaded parts
- Instant, low-pressure seal
- Prevents fluid and gas leaks
- Withstands most common chemicals
- Ideal for applications such as pipe fittings and hydraulic hoses

*Can only be used on metal pipe threads. Please refer to the Technical Data Sheet for details.
