

Warm Melt Supply Systems

For warm melt materials and
temperature conditioning applications

PROVEN QUALITY. LEADING TECHNOLOGY.

Advanced Technology with a Modular Approach

Precision temperature control

Designed specifically for warm melt materials and temperature conditioning applications, Graco Warm Melt Supply Systems deliver superior heat control and performance in a reliable, easy-to-use, easy-to-maintain package. Instead of investing in a custom solution or equipment meant for other applications, Graco Warm Melt Supply Systems offer performance and flexibility at a reasonable price.

Easy to Service

- Smart design and simple features reduce time spent on maintenance
- A turnbuckle raises the air motor for easy maintenance

Precision Temperature Control

- Ensures consistent processes with accurate temperature control
- Modular controls eliminate the unreliability of point-to-point wiring

Check-Mate® Pump

- Quick-disconnect coupler reduces maintenance time

Integrated Drum Air Blow-Off

- Reduces downtime with quick, easy drum changes

Modular Design

- Modular approach lets you configure a system to fit your operation

Display Module

- Intuitive, easy-to-use screen navigation provides simple setup, monitoring and diagnostics

Integrated Air Controls

- Conveniently located – easy to see, easy to use

Platen Design

- Modular heaters provide plenty of power without the expense of a custom platen
- Minimizes leftover material and reduces waste
- Long-lasting, one-piece platen seals are easy to replace

Graco Warm Melt Supply System

Simplified maintenance reduces downtime

The control enclosure on the system contains temperature control modules, fuses, and electrical components that are extremely easy to remove and replace. No more point-to-point wiring or printed circuit boards – instead, control modules and components are designed for snap-on, snap-off removal and installation.

Easy Diagnostics

Easy to see green, yellow and red diagnostic lights indicate module status. If a control module needs to be replaced, simply remove the module and plug in a replacement.

Circuit Breakers and Electrical Components

- Modular assembly replaces complex wiring

Smisline Rail

- Distributes power to components
- Provides easy snap-on installation, reducing maintenance downtime

Low-power Temperature Control Modules

- For pump, hose and gun

High-power Temperature Control Module

- For heated platen

Applications

- Material transfer
- Automotive assembly
- Tier one automotive suppliers
- Door and window manufacturing

Materials

- Urethane
- Epoxy
- Warm melt sealers

Advanced Controls – The Rules Have Changed

Advanced, intuitive controls

The electronic controls on Graco Supply Systems help you monitor and control critical factors through an easy-to-use interface.

Display Module for efficiency and control

The Display Module allows you to configure your supply systems to operate in tandem for better productivity and improved uptime.

- Easy-to-use interface puts the operator in total control
- Gateway module can be added to connect your Warm Melt System to a fieldbus for external monitoring and control

Run screen

Simple, intuitive, icon-based heat control. Displays both set point and actual temperatures. Configurable for tandem systems. Controls four to six zones per ram or up to 12 zones for tandem systems.

Setup screens

Password protection optional. Adjustable warning and alarm limits, and setback temperature.

ABOUT GRACO

PROVEN QUALITY. LEADING TECHNOLOGY.

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
